

FOR CONCRETE

Customer context, with every call.

Bring existing service history
into the employee's call experience.

A focused first collaboration.

Waiting on the branch

LATEST NOTE

Branch review is still pending.

The history exists. Finding it takes a manual step.

The employee can already find previous tickets by searching the phone number.

The call and the service history

REPORTED WORKFLOW

Manual

 **Desk · ticket history**

 Search: +20 . . . 410 

 **T101 · Exchange follow-up**
Latest update: branch review pending

The employee searches before they can pick up the previous conversation.

The call arrives. The context comes with it.

The caller's number triggers the lookup in Zoho Desk.

"I can see your earlier ticket. The branch review is still pending."

Connect the call to the service history.

Each system keeps its role. GRINDCTRL completes the workflow.

ILLUSTRATIVE WORKSPACE

CONCRETE · PROPOSED COLLABORATION

05 / 09

The same information. A better start.

Fewer manual retrieval steps before an informed response.

Before

-  Receive the call
-  Search manually
-  Find the right ticket
-  Read the latest update

Proposed after

-  Receive the call
-  **Customer context appears**
-  Read the latest update
-  Continue with context

Spend less of the call finding the context.

More attention to the customer.

Practical benefits for the employee and the service experience.

A conversation with context

“I can see your earlier ticket.
The branch review is
still pending.”

Grounded in the recorded note

Less manual searching

Fewer steps before the informed response.

Faster case understanding

The latest ticket note is already in view.

Smoother follow-up

Continue from the existing service record.

Expected benefits · measure the change in an agreed pilot.

A foundation for future improvements.

Optional capabilities, scoped separately from the first delivery.

AI ticket summaries

Short summaries with links to the original notes.

Recurring issue detection

Find patterns across existing service tickets.

Management visibility

A clearer view of service and follow-up patterns.

Follow-up support

Suggested next steps for employee review.

The first delivery stays focused on caller context.

THE FIRST DELIVERY

Start the call with customer context.

A better start for the employee.
Better continuity for the customer.

Existing systems. Existing records. A more informed conversation.

Check the existing pop-up

Confirm how the current setup behaves.

Complete the supported connection

Choose the right native option or adapter.

Test agreed calls

Verify the context and the fallback behavior.
